PROFILE

Versatile software engineer with a Master's-level engineering degree, working across the full lifecycle of digital products: requirements analysis, architecture, frontend/backend development, APIs, mobile, AI, databases, cloud, systems and networking. My experience in both companies and freelance projects has made me comfortable adapting quickly to varied technical environments, with a strong focus on quality, performance, security and business needs.

E PROFESSIONAL EXPERIENCE

MyHextech - Freelance
2025 - Present

Freelance Software Engineer - Full-Stack, Mobile, AI & Cloud

End-to-end design and development of web and mobile solutions: requirements analysis, architecture, frontend/backend, API and AI integrations, databases, cloud deployment and technical project support.

FR INVEST - Paris (work-study)
2021 - 2024

Software Engineer - Full-Stack, Real-Time 3D & Cloud

Development of web platforms, TypeScript metaverses and mini-games, React/Python applications, Unity games, Unreal Engine 5 environments and AWS cloud services.

CAP MONDE - Louveciennes (work-study)
2019 - 2021

IT Assistant - Development, Systems & Support

FileMaker and web development, IT maintenance, user support and day-to-day administration of technical environments.

T TECHNICAL SKILLS

FRONTEND	React, Next.js, Vue.js, Angular, TypeScript, Tailwind CSS, Bootstrap, shadcn/ui
BACKEND & APIs	Node.js, NestJS, Express, Python, FastAPI, Spring Boot, REST APIs, GraphQL
SYSTEMS & NETWORKING	Linux Debian/Ubuntu, Bash/Shell, TCP/IP, IPv4/IPv6, DNS/DHCP, VLANs, routing/NAT, SSH, firewalls, Wireshark, Cisco IOS, VirtualBox/VMware
CLOUD & DEVOPS	Git, Docker, CI/CD, GCP, AWS, Vercel, deployment and cloud environments
DATABASES	PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Redis
MOBILE	Flutter, FlutterFlow, React Native, iOS and Android deployment
AI & AUTOMATION	AI API integration, conversational agents, automation, PyTorch, TensorFlow
3D & REAL-TIME	Unity 2D/3D, Unreal Engine 5, WebGL, Pixel Streaming

P SELECTED PROJECTS

W WEAREVENTS.FR

Event venue search platform with back office

Designed and developed a desktop platform for searching event venues, including a management back office.

React | Vite | TypeScript | Supabase | S3 | Edge Functions

J POINTJAPONVOYAGE.FR

Travel website dedicated to Japan

Designed a responsive showcase website presenting Point Japon Voyage's services, destinations and content.

Web design | Responsive | UI/UX | SEO | Branding

V VIRTUALSOMM

Virtual sommelier application for restaurants

Developed a wine recommendation and discovery application for restaurants.

React | Next.js | TypeScript | Tailwind CSS | API

S SIMVIA - EDF GROUP

Frontend assignment - CMS and GraphQL

Integrated a modern interface from Figma designs, connected it to the CMS and linked data through GraphQL.

React | Next.js | TypeScript | GraphQL | CMS | Figma

E ENTRAVE

Event prediction platform

Developed a modern event betting and prediction platform with a smooth user experience.

React | Next.js | TypeScript | Tailwind CSS | UI/UX

A WANTEED - APP & WEBSITE

Complete redesign and premium subscriptions

Redesigned the UI/UX, evolved the free/premium logic, implemented subscription management and deployed to iOS/Android.

React Native | FlutterFlow | Firebase | iOS | Android

AI TELEGRAM AI CHATBOT

AI chatbot with usage tracking

Developed a Telegram AI chatbot with API-based account connection, comprehensive user usage tracking and containerized backend services.

Telegram API | Python | Node.js | AI API | Docker | Redis

E EDUCATION

2021 - 2024
Engineering Degree (Bac+5) in Software Development and Applications
ESIEE-IT, Pontoise

2019 - 2021
BTS SNIR work-study program
ESIEE-IT, Montigny-le-Bretonneux

Q QUALIFICATIONS & CERTIFICATIONS

2025	TOEIC
2024	Software Engineering Degree
2021	BTS SNIR
2021	Voltaire Certificate
2018	Scientific Baccalaureate
